Robert Modre-Osprian is a scientist and certified project manager at AIT. He received his MSc in technical physics and his PhD in biomedical engineering at the Graz University of Technology. He has many years of experience in design, acquisition and management of clinical and industrial RTD projects. He is a lecturer in Computational Medicine and has comprehensive experiences in development, testing and validation of mathematical algorithms in medicine and telemedicine solutions. In the last 15 years he worked on noninvasive cardiovascular functional imaging, ICT for clinical bioinformatics and systems biology, modeling of biological systems, mHealth and telemedicine as well as eHealth closed-loop healthcare applications.
